

Welcome to Dell InnovateDash 2026!

Ngee Ann Polytechnic
14th January 2026

Today's Agenda

Welcome to InnovateDash

Introduction by MINDS
Problem Statement Q&A

Before you go...

Welcome to
InnovateDash!

Dell Technologies InnovateDash is ...

A bite-sized Hackathon with
a **heart**; build a purposeful
technology prototype in
response to a problem
statement by

MINDSG Ltd

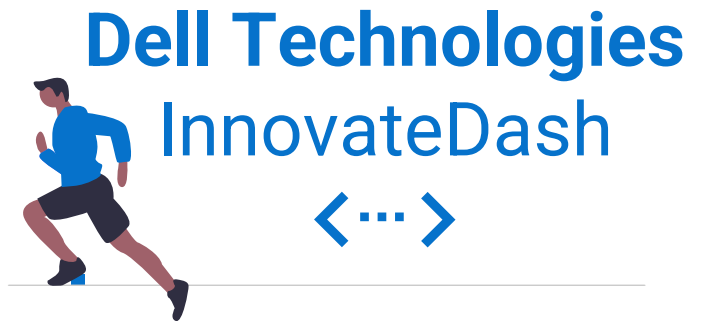

A learning opportunity;
level up your technical skills
and build on your
interpersonal skills through
our guest lecture by our
experts from Dell
Technologies and our
partners

A chance to represent;
The winner will represent
Nanyang Polytechnic in our
interschool hackathon;

Dell InnovateFest
(in September 2026)

to stand a chance to win up to
SGD 10,000

NGEE ANN POLYTECHNIC AT DELL INNOVATEFEST

NP InnovateDash AY25/26 Summary - Milestones & Key Dates

You are here!

Week 12

Week of 5th Jan '26

Discover

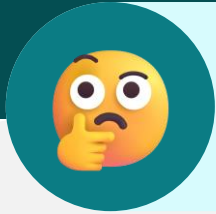

Problem Statement Release

Problem statement will be distributed via your LMS.

Teams may proceed to brainstorm and list out questions for clarification.

Week 13

14th Jan '26

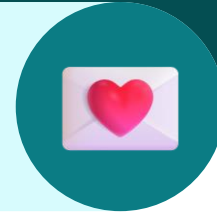

Define

Problem Statement Sharing

MINDS will host an interactive live Q&A session providing additional insights and clarifying any doubts related to the problem statement.

Week 17

10th – 12th Feb '26

Deliver

Final Presentation (Co-assessment w/ Dell)

Teams will present their final solutions which will be co-assessed by the teaching team and Dell Technologies representatives.

Week 18

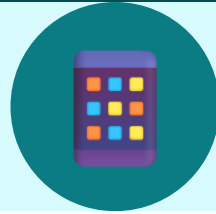

13th Feb '26

Deliberate

InnovateDash Final Presentations

Top 3 teams from the cohort will present their final solution to a judging panel consisting of MINDS and Dell Technologies' experts.

Develop

Prototype Development

Ideate and develop your prototype, while consulting your lecturers

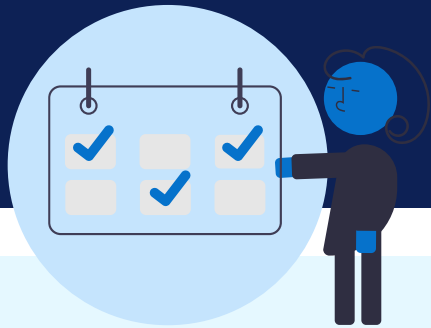

NP InnovateDash Champion Team's Prize

Each member will walk away with a
Alienware Wireless Gaming Mouse
AW620M (worth S\$139)

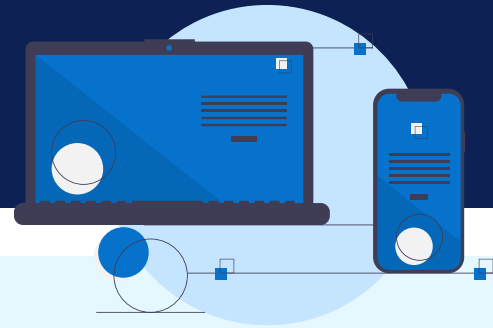

What to expect in your Final Presentation?

Each team will have 20-mins to present and 10-mins of Q&A

Highlight your **recommendations** addressing the problem statement

Always relate your solution back to the problem statement and highlight how it benefits the target audience

Walkthrough your solution and **demo key features**

Perform a live demo on your application. Remember to vocalize how these features address the problem statement

Address questions from the judging panel during Q&A

Your judges may have questions on your overall solution or thought process; be precise and thoughtful in your answers

Your teams' solutions will be assessed based on the following...

Key Components & Weightage

Strategies & Recommendations	30%	• Outlines well-justified strategies and recommendations aligned with the problem statement • Demonstrates thorough evaluation and thoughtful consideration in formulating the proposed solution • Addresses user needs and challenges, aiming to improve quality of life.
Cloud-Native Design Adoption	30%	• Adopts cloud-native principles and modern software architecture to ensure portability, scalability, efficiency, and resiliency • Enables deployment of solution across multi-cloud environments, ensuring adaptability and robustness
Solution Evaluation & Innovation	30%	• Demonstrates both technical feasibility and economic viability of the solution. • Leverages proposed technology appropriately and thoughtfully throughout the solutioning process. • Presents a functional prototype or proof-of-concept (PoC) that reflects originality, creativity, and ingenuity in addressing the problem.
Presentation & Q&A	10%	• Communicates the proposed solution clearly and confidently. • Engages the audience with enthusiasm and clarity. • Responds to questions with well-elaborated, insightful answers

Bonus Component

AI Adoption & Innovation	5%	• Adopts and implements AI technologies meaningfully within the solution. • Demonstrates clearly how AI enhances functionality, user experience, or performance. • Articulates the unique value AI brings compared to traditional approaches.

About Intellectual Disability

minds

Defining Disability

Overview of Disability Types in Singapore

SG **ENABLE**

Physical Disability

Partial or total loss of bodily functions or body parts

Congenital / Hereditary or Acquired (through accidents or medical condition)

Physical Disability is a feature of **Muscular Dystrophy, Cerebral Palsy, Brittle Bones**

Sensory Impairment

Blind - < 3/60 (10/200)

Low Vision - < 6/18

Tunnel Vision – loss of peripheral vision with retention of central vision

Deafness or Hard of Hearing – Partial or full hearing loss. At times, accompanied by speech impairment

Intellectual Disability

IQ 70 and below

Have difficulty grasping concepts, problem solving and in performing daily living activities

Intellectual Disability is a feature of **Down syndrome, Prader-Willi syndrome, Williams syndrome**

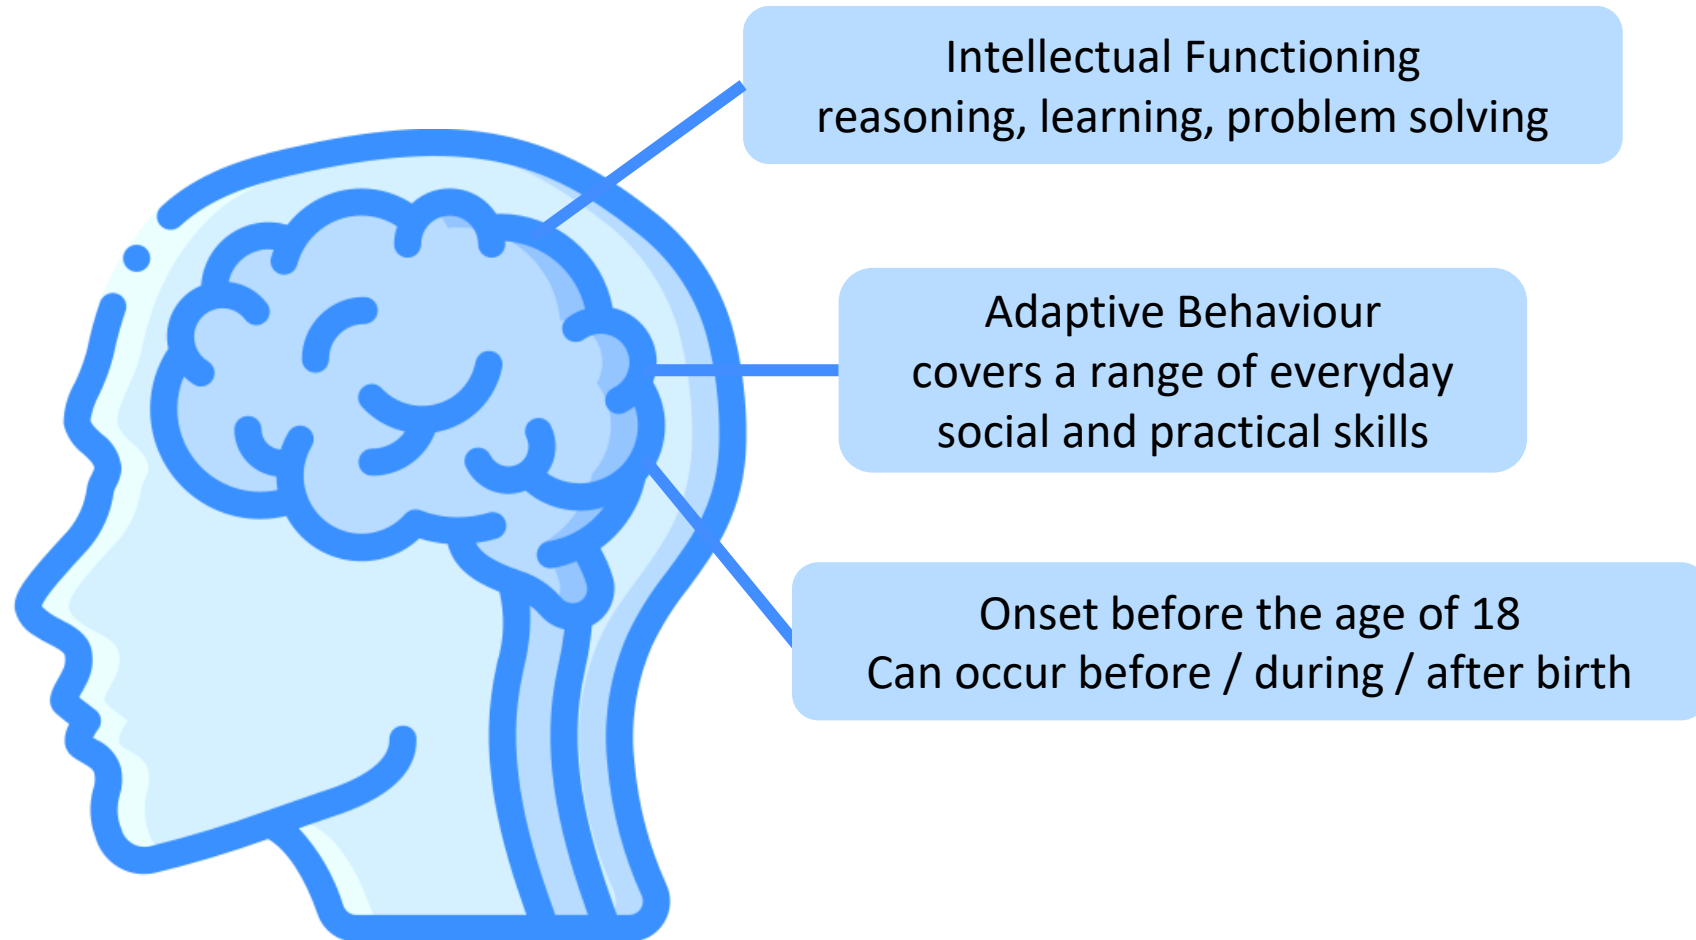

Autism

Complex developmental disorder that affects the brain's normal development

Typically exhibits difficulties in communication and social interaction, sensitivity to sensory stimulation and repetitive behaviour

Intellectual Disability (ID)

ID is a Developmental Disorder characterized by significant limitations in:

Some Common Misperceptions about Persons with ID

Myth

Intellectual disability is hereditary.

People with intellectual disability are mentally ill.

People with intellectual disability cannot learn and/or work.

Fact

ID can be inherited or caused by external influences, some of which can be prevented.

People with ID do not develop normally and have limited thinking abilities as a result. They are, however, not mentally ill.

There are effective methods to teach people with ID. With appropriate support, they can acquire skills and find gainful employment.

MINDS has been Serving Persons with Intellectual Disability (PWIDs) since 1962

Our Vision

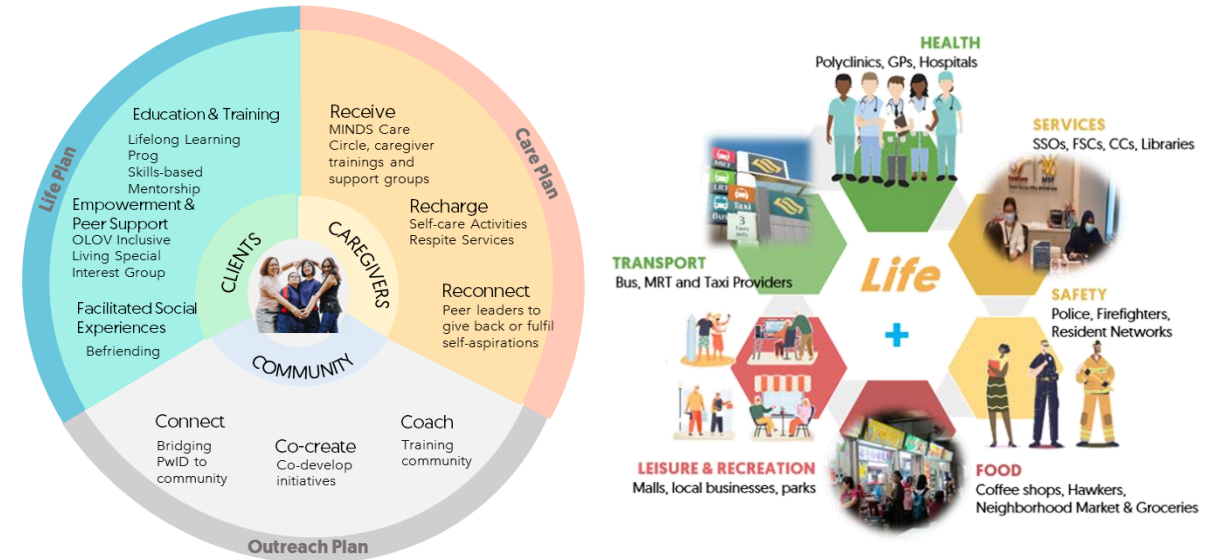

To be the lead social service agency in the PWID Space

Our Purpose

To enhance PWIDs and their Caregivers Quality of Life

Our Mission

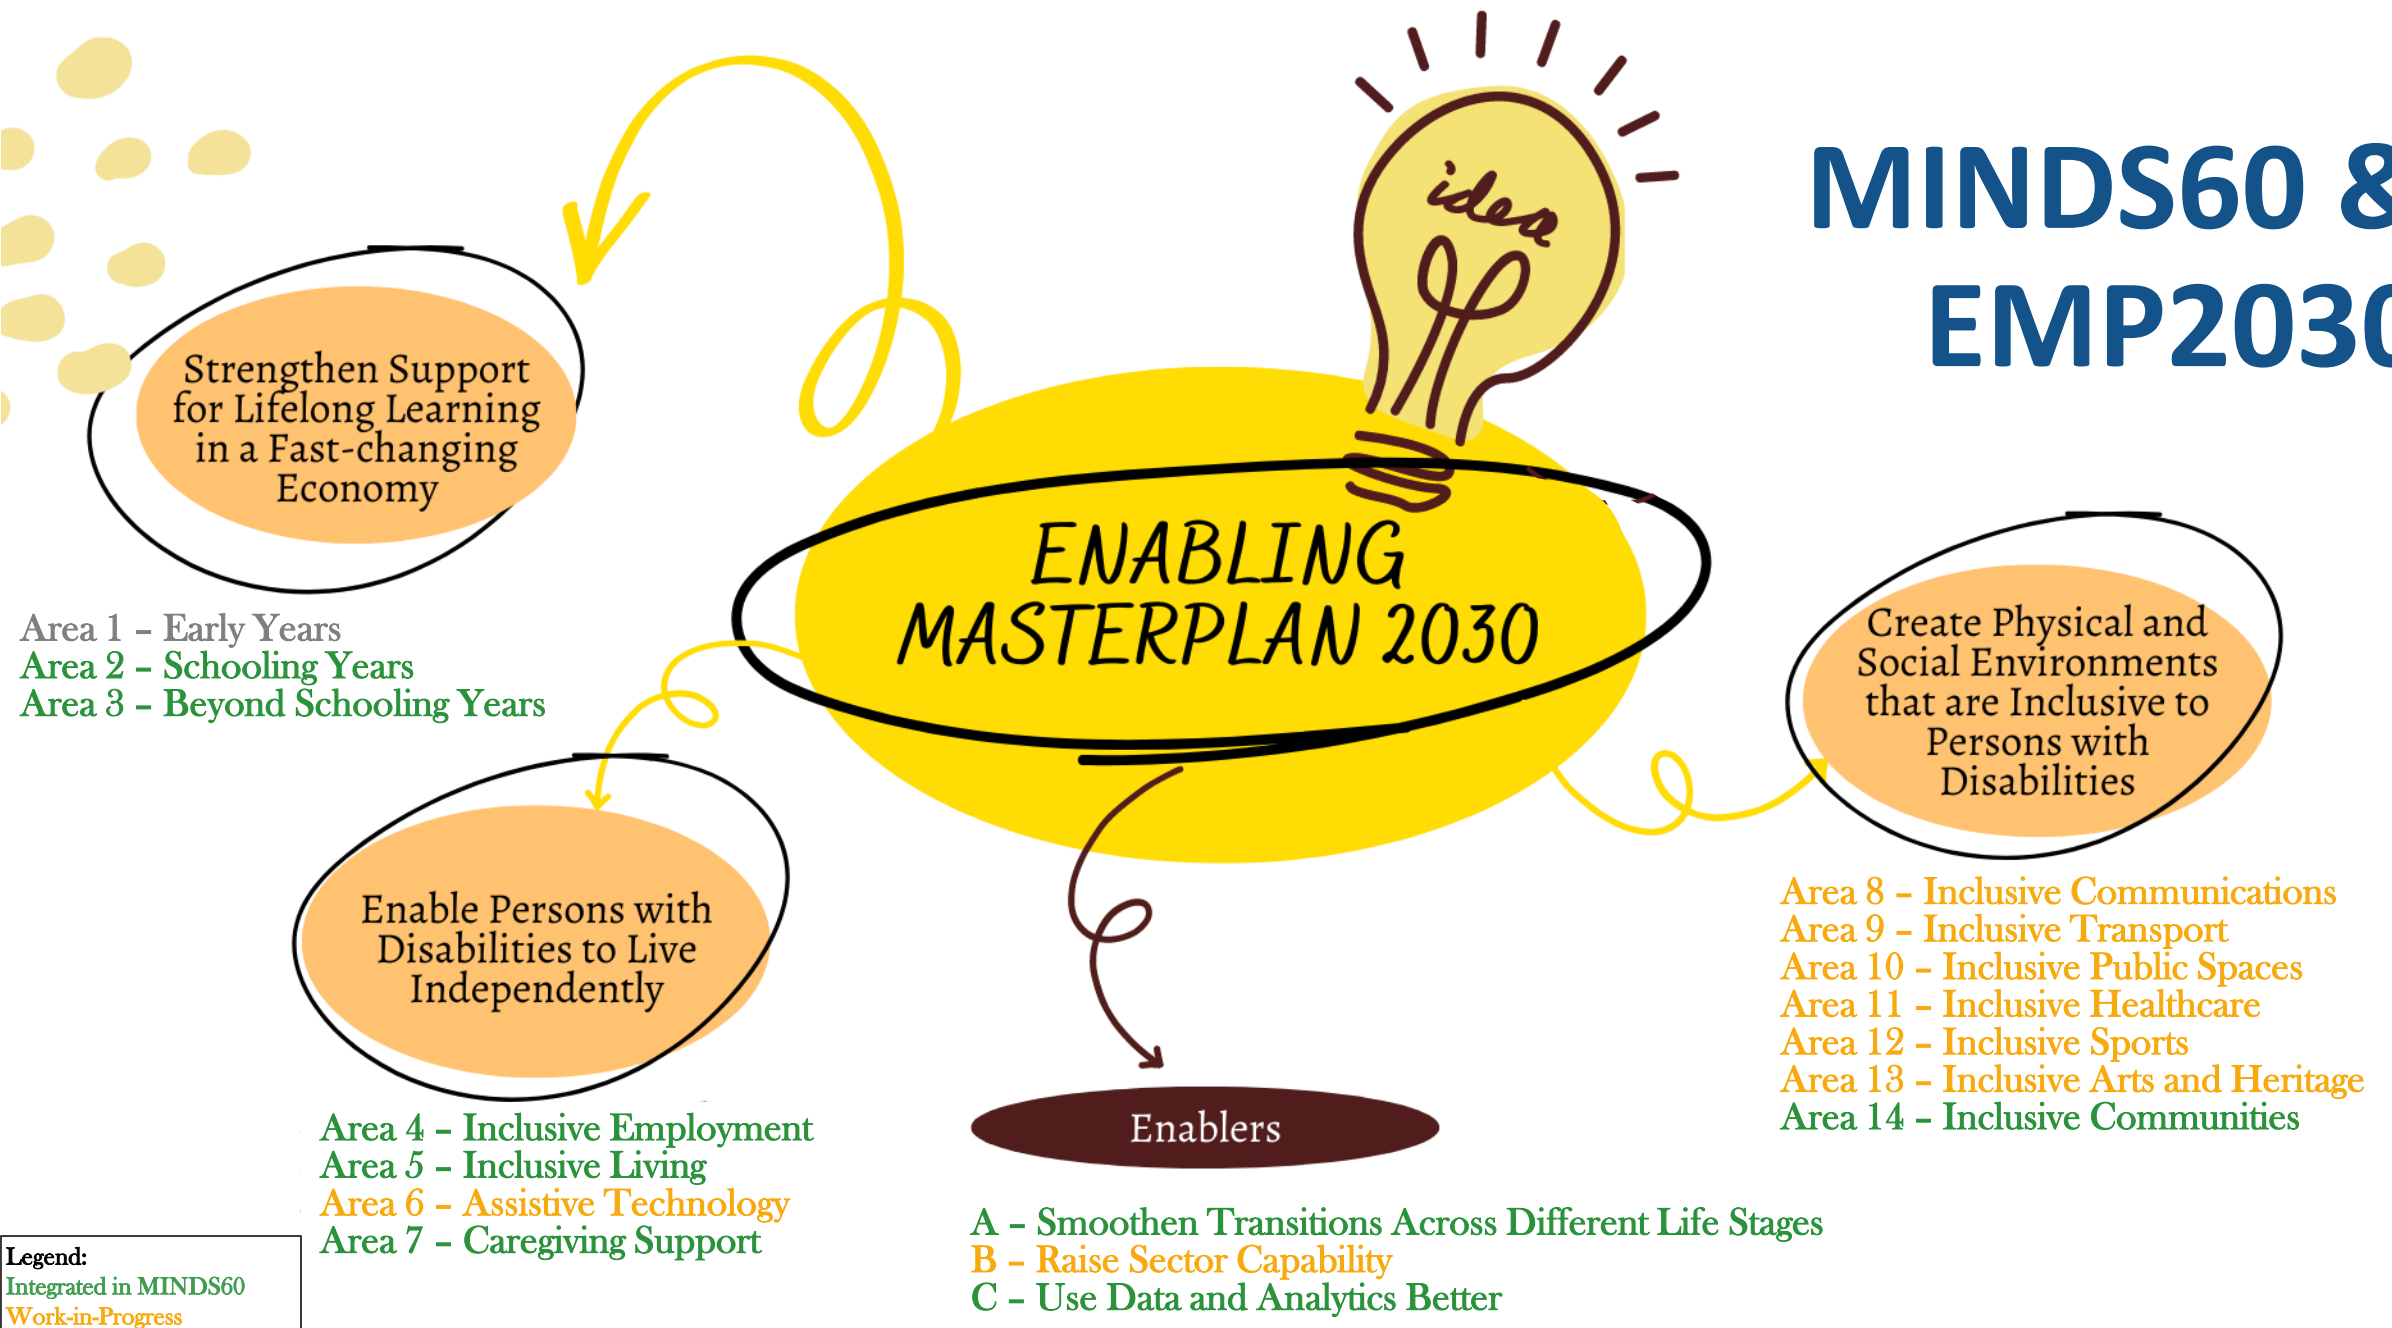

To advance the development, well-being and aspirations of PWID
& to advocate for their integration into society.

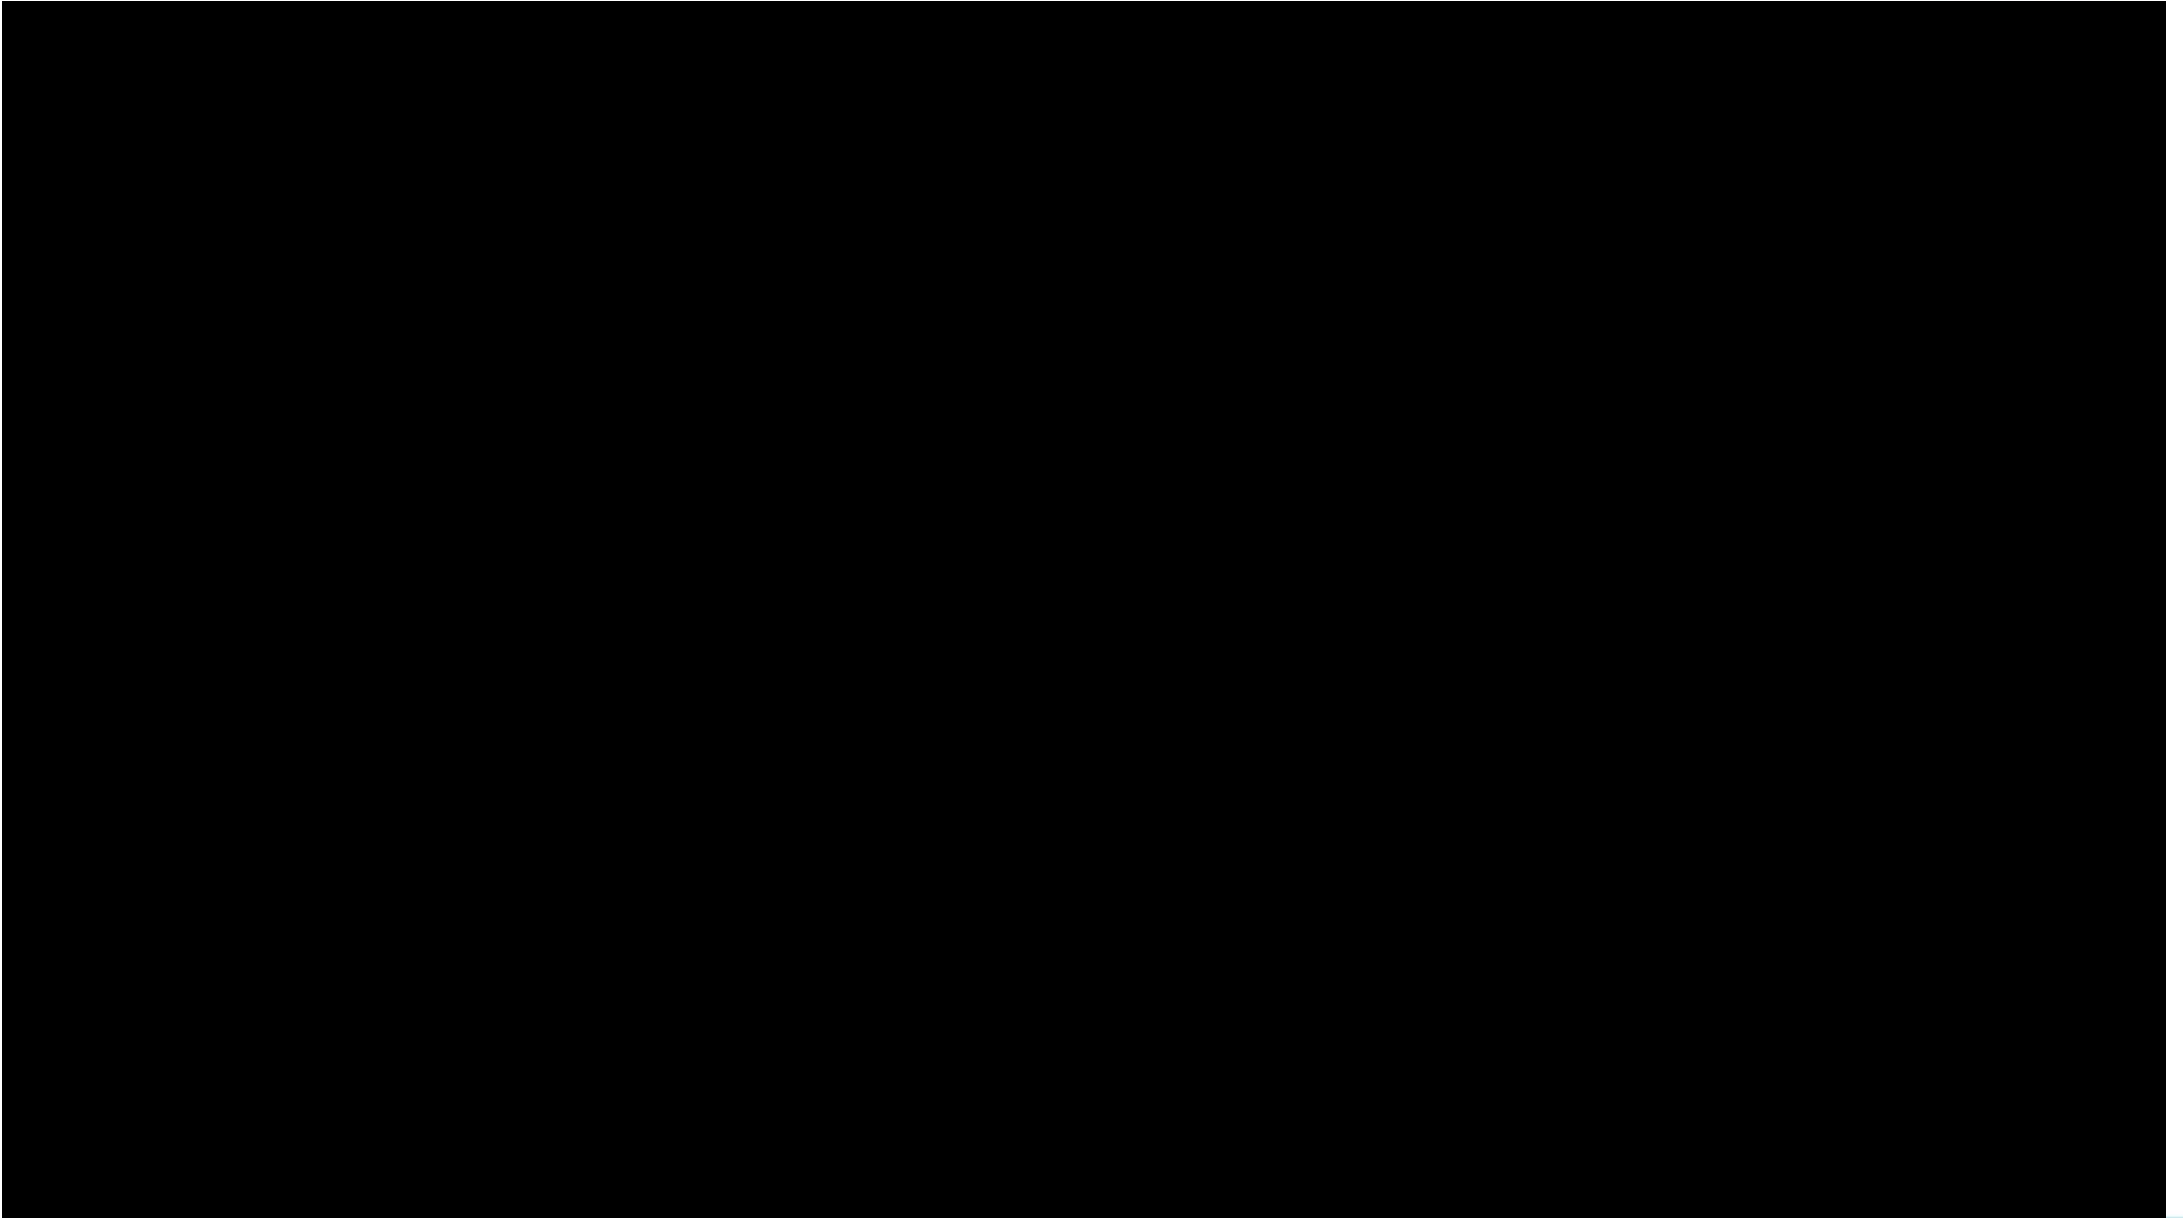

MINDS enhance PWIDs Quality of Life through:

- Multi-service operating model guided by the Life+ framework (5Cs - Client, Caregiver, Community, Civic Society, Corporates)
- Person-centered, family-oriented, lifespan approach
- Grounded in the belief that all PWIDs have innate talents and strengths

MINDS60 & EMP2030

Enabled Living Programme (ELP)

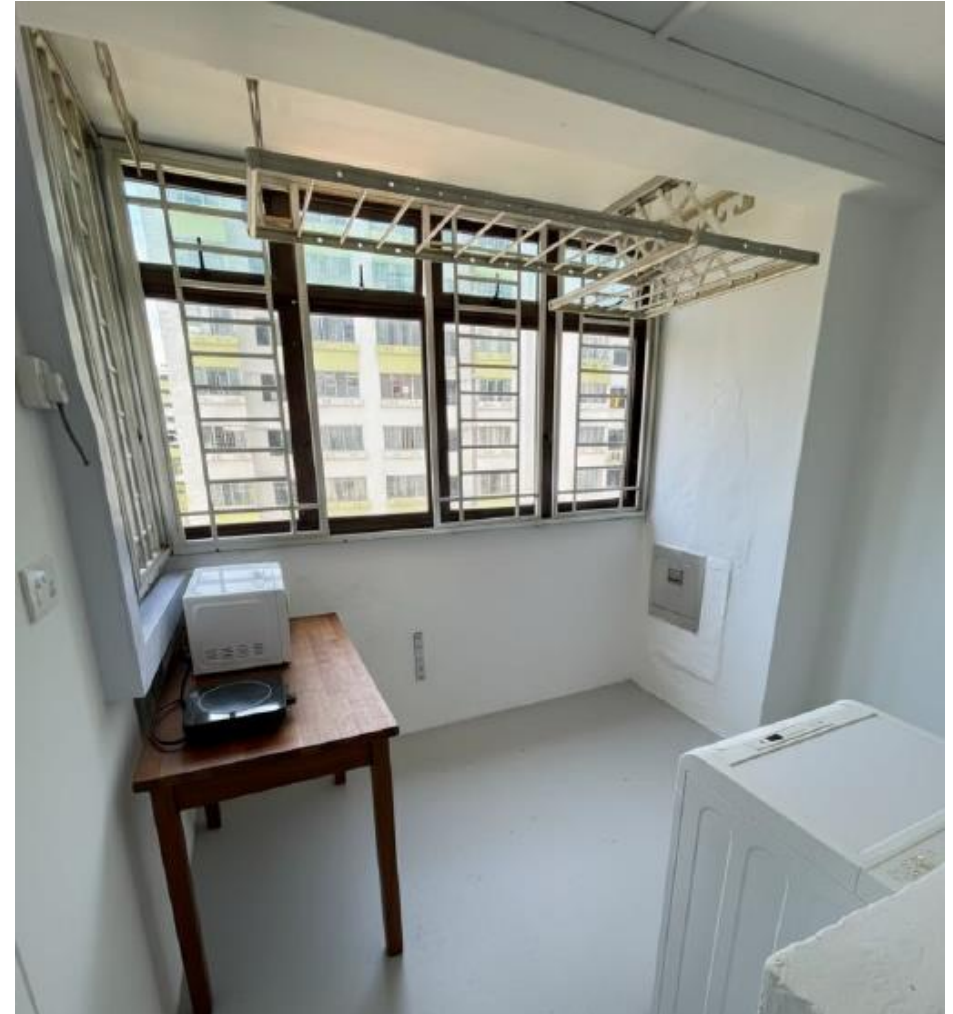

- By the Ministry of Social and Family Development (MSF) and SG Enable under the Enabling Masterplan 2030
- Community living initiative for adults with disabilities
- 35 - 64 y/o, with low to moderate support needs
- Live in public rental flats

Aim: Empower and enable adults with disabilities to live independently for as long as possible

Enabling Lives@Bukit Merah by MINDS

A part of Enabled Living Programme (ELP)

- Adults with ID and/or Autism
- Can live independently with minimal support
- 2 clients per HDB unit
- On-site services such as daily living and social skills coaching
- Community engagement

Enabling Lives@Bukit Merah by MINDS

A part of Enabled Living Programme (ELP)

Living Room

Bedroom

Problem Statement

Persons with Intellectual Disability (PWIDs) often require support when carrying out daily self-care and household tasks, also known as Activities of Daily Living (ADLs). These include (but are not limited to) grooming, taking required medication and cleaning.

Whilst seemingly routine, some PWIDs may forget to fulfil them in a timely manner, resulting in inadequate personal hygiene, missed mealtimes, etc.

Problem Statement

How might we use technology to support and empower PWIDs in completing and tracking their daily self-care and household tasks, without unnecessarily infringing upon the privacy of their home environment?

Q&A
